CAREER OBJECTIVE

B.Tech Information Technology student focused on software development, AI applications, data structures and algorithms, and backend engineering. Interested in building practical systems using Python, Java, Spring Boot, REST APIs, databases, and modern AI technologies.

EDUCATION

Karpagam College of Engineering | B.Tech Information Technology | Expected Graduation: 2029

TECHNICAL SKILLS

Programming: Java, Python, C++, C, JavaScript

AI & Voice: LiveKit Agents, Speech-to-Text, Text-to-Speech, LLM Integration, Multimodal AI

Backend: Spring Boot, Spring Security, REST APIs, JWT Authentication, Maven, JPA/Hibernate

Web: HTML5, CSS3, JavaScript, JSON

Databases: MySQL, H2, SQL, DBMS

Core CS: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks

Tools: Git, GitHub, VS Code, IntelliJ IDEA, MySQL Workbench, Postman, Node.js, npm

PROJECTS

Whis | AI Desktop Voice Agent

Built an AI-powered desktop voice agent using Python and LiveKit with a real-time Speech-to-Text → LLM → Text-to-Speech pipeline. Integrated Deepgram speech recognition, Google LLMs, Inworld TTS, Tavily web search, Gemini-based screen understanding, and Windows automation. Built a custom UI and profiled runtime performance, reducing idle CPU usage from approximately 19.5% to 3–4%.

Todo Application | Full-Stack Task Manager

Developed a full-stack Todo Application using Spring Boot, Spring Security, JWT Authentication, MySQL, HTML, CSS, and JavaScript. Features include user registration and login, JWT authentication, add/update/delete todos, marking todos as completed, user-specific todo management, and REST APIs built with Spring Boot.

Portfolio Website

Responsive personal portfolio using HTML, CSS and JavaScript with an interactive space-themed UI, custom rocket cursor, animated solar-system background, project demos, and a Node.js/Express contact backend using Nodemailer.

Calculator

Built a responsive calculator using HTML, CSS, and JavaScript supporting arithmetic operations, decimal input, expression evaluation, backspace, and clear functionality.

C Bank Simulation

Console banking simulation developed in C, supporting account creation, deposits, withdrawals, balance checking, and minimum-balance validation. Portfolio version includes a JavaScript terminal emulator.

PROBLEM SOLVING

300+ problems solved across LeetCode, CodeChef, and GeeksforGeeks, with practice in data structures, algorithms, SQL, and competitive programming.

CERTIFICATIONS

- HackerRank - Problem Solving (Basic)
- HackerRank - Problem Solving (Intermediate)
- HackerRank - Java Certificate
- CodeChef - Learn SQL Certificate
- NPTEL - Business and Fundamentals - Score: 80/100, Elite Silver
